

# Cyber-Tech Robot Characters - Big Beat Entertainment

**Robotic meet and greet characters suitable for all types of functions and events.**

CYBER-TECH Robotic characters add great impact for all types of events for the Corporate entertainments industry. Listed below are some of the different types of functions CYBER-TECH ROBOTS are suitable for store promotion, Shopping Malls, Product Launches, Corporate Exhibition Stands, Car Launches, Trade Shows, Private Parties, Wedding, Balls, Team training days plus many many more.

**Primo** is the stunning 6' 3" tall walking, talking robot well adapted to meeting and greeting humans of all ages. With his clear synthesised voice, he is capable of singing (badly) and telling daft jokes to the kids - even to grown-ups on the odd occasion.

**The Robotic Waiter** is a unique and fascinating Character capable of handing over drinks to arriving guests or distributing give-aways. This character has a smart 80's style robotic image with servo motorised sound effects synchronised with each robotic movement.

**Servo Dummies** characters can act like shop window display dummies and move an arm up and down robotically slow.

**Borg-Stiff** is based on the menacing yet iconic Star Trek Cyborgs. The character has many light effects around both the facial area and on the main body armour – an eerie likeness to our cybernetic friends from Star Trek, although Borg-Stiff is indeed unique with no royalties to pay.
