

# The Kopycat Killers

## - Big Beat Entertainment

The Kopycat Killers were born when frontman Stuart was told for the 200<sup>th</sup> time at one of his own gigs, that he 'sounds just like that bloke out of The Killers' and being a huge, huge fan thought, "well why not!"

The attention to detail is second to none - featuring authentic tones and sequenced studio sounds to ape 'The Killers' own, backing musicians, stagewear, instruments, set choice and decoration (including the Killers own famous 'K' keyboard stand) - it's all present and correct. There are even authentic projections and visuals on LED Screens playing in time with the songs, just like a Killers arena show!

They have performed to thousands of fans over the years at events such as Oxbridge Balls, Fake Festivals and high profile corporate events. A great authentic tribute show.

### Sample set list
